Our school plans to utilize the "One-off Grant for Promoting Self-Directed Language Learning (Putonghua)" in the 2026/27 school year to cultivate students' interest in language learning and enhance their Putonghua proficiency through diverse resources, professional training, and experiential activities. The specific proposals for each category are outlined below:

（1）Procurement and/or Subscription of Learning Resources

To facilitate students' self-directed learning beyond regular class hours, the school plans to continue subscribing to the **"HKCCP Online Learning Platform"**, leveraging information technology to help students consolidate their Putonghua skills anytime, anywhere. Furthermore, we will actively support students in participating in various **"Putonghua Competitions and Activities"**, encouraging them to challenge themselves on external stages and broaden their linguistic horizons through active participation.

（2）Employment of Non-establishment Putonghua Tutors or Support Staff

To provide targeted guidance, the school plans to organize a **"Putonghua Speech Class"** led by professional external tutors. This class will deliver systematic training in elocution and oral delivery to boost students' pronunciation accuracy and public speaking confidence. Additionally, in conjunction with the school's **"International Culture Week"**, we will host **"Putonghua Booth Activities"**, creating a fun, interactive, and immersive Putonghua-speaking environment on campus through language games.

（3）Acquisition of Learning and Teaching Services

Striving to integrate language practice with interdisciplinary knowledge, the school plans to **co-organize a cross-curricular mainland study tour** this academic year, guiding students to apply their language skills in authentic cultural and academic settings. In addition, to support the implementation of the **"Speak Well, Read Well Putonghua — 2026 Putonghua Summer Award Scheme"**, the school will subsidize the **transportation costs for its extended activities**, encouraging students

to actively engage in off-campus learning experiences and deepen their self-directed learning outcomes.
